

# Sonoran CAD Voice Commands Tutorial

Sonoran CAD's voice commands allow for quick and easy to use actions via voice.

**NOTICE:**

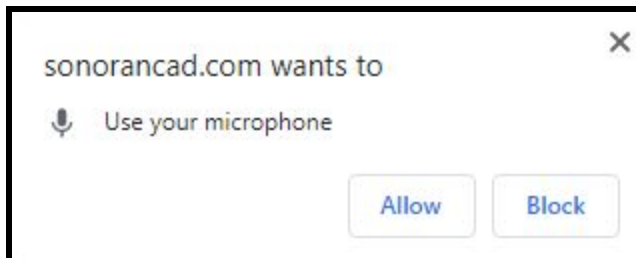

Currently, Sonoran CAD only supports voice commands in the Chrome desktop browser.

---

## 1.1 Enable Microphone Access:

When navigating to a page with voice commands enabled, the browser will prompt you for microphone access.

Select "Allow"

Now that microphone access has been granted, a red circle will appear at the top right of the browser tab.

---

## 1.2 Available Commands:

*Note: All voice commands are triggered using the key word "Sonoran"*

Action	Voice Usage	Description
PANIC	"Sonoran, PANIC"	This command toggles your unit's PANIC state.
STATUS	"Sonoran, set status 10-6" "Sonoran, set status 10-7" "Sonoran, set status 10-8"	This command changes your unit's current 10-Code status.
LOOKUP NAME	"Sonoran lookup name <first> " "Sonoran lookup name <first> <last>" "Sonoran lookup name <first> <last> <mi>"	This command opens a new lookup window and searches records under the given name.
LOOKUP PLATE	"Sonoran lookup plate <license plate number> "	This command opens a new lookup window and searches records under the given license plate.
